Contents

Volume 1

Foreword	1
Editor's introduction	5
History	5
Basic plan	7
Mnemonic aids	8
Form divisions	10
Annotations in the tables	12
Alternative provisions	14
Variations	15
Use of letters	16
Structure	18
Degree of expansion	19
Dealing with long numbers	20
Relocations	21
Obsolescent schedules	22
Evolutionary development	23
Suggestions for use	23
How to use the tables and index	23
How to determine the subject of a book	23
How to assign the class number	24
Spelling	25
Acknowledgments	25
Conclusion	27
Melvil Dewey's introduction	29
Description	29
Origin and growth	29
Extent of use	30
What is the system?	31
Notation	32
Best known decimal form	32
Relative subject index	33
What relative index includes	35

Decimal Classification

Special author table for William Shakespeare	2425
Table for college and university publications	2428
Obsolescent schedules	2429

Foreword

"We earnestly request all users to give us the benefit of their criticism in order that sometime our successors may actually bring out the perfect book'" This invitation which appeared in the foreword to the Standard (15th) edition was, of course, not accepted by 'all users' but a generous number did respond in print, through correspondence or orally. This extensive criticism, both favorable and unfavorable, cannot be summarized here but its constructive nature provided specific guidance for the preparation of this edition and led to a request on the part of the Lake Placid Club Education Foundation that the Library of Congress assume the responsibility for the editorial work. Responsibility for editorial policy rests with the Decimal Classification Editorial Policy Committee, a joint committee of the Lake Placid Club Education Foundation, the American Library Association, and the Library of Congress.

Editions 2-14 of the classification were each characterized largely by the addition of expansions of particular parts of the classification. After the 14th edition appeared in 1942 many American librarians came to believe that a standard edition, in which all parts of the classification were expanded to the same degree, would be preferable to one in which some parts appeared in extreme detail while others were relatively unelaborated.¹ In response to this desire for a standard edition the 15th edition which appeared in 1951 included reductions of those parts which were deemed to be in too great detail, expansions of parts insufficiently detailed, and, in addition to provision for new concepts, a modernization of the terminology.

Criteria for the 16th edition were adopted by the Editorial Policy Committee in 1953, and revised in 1955, to guide the editorial staff in the preparation of an edition to meet the criticisms that the 15th edition was insufficient for the needs of many libraries. In the restatement, the objectives of this edition were described as follows.

The 16th Edition shall be designed for use in the classification of books and similar materials in general libraries, regardless of size except (1) those libraries which prefer to use an abridged edition and (2) those libraries with special collections which prefer to use close
