

Index

A

Abdomen, *see also* Pelvic viscera

closure after surgery, 251

diagnosis—common conditions for, 234 f.

differentiation from adult, 224, 236 f.

disease of, surgical aspects, 224 ff.

distention, postoperative—management, 253

examination

anesthesia for, 233 f.

face-down position for, 234

by palpation, 234

for pelvic disturbances, 233 f.

by percussion, 234

technic, 47

malignancies, 225, 231

surgical aspects, 247 ff.

Abortion attempt: bladder foreign body from, 275

Abscess

appendical—antibiotics for, 245

of culdesac, colpotomy for, 243 f.
pelvic

rectal examination for, 46 f.

from trauma, 243

perianal, 300

with salpingitis, 238

Adenoma: of rectum and colon, 302 ff.

Adhesions: postoperative, obstruction from, 242

Adolescence

breasts in, 173 f.

definition, 171

disorders of, 168 ff.

emotional considerations, 169 f., 195

endocrine influences, 174 f., 179, 192 f.

fat deposition in, 172

genitalia (externala) in, 173

and puberty—differences, 171

pubic hair, development of, 172 f.

sex characteristics in, 172 f.

Adoption: physician's role in, 318 f.

Ameba: proctitis from, 306

Amenorrhea, primary, 196 ff.

endocrine therapy, 204

estrogen determination in, 198

estrogen therapy, 206

management—general, 196 ff.

progesterone dosage for, 207

tests for, 198 ff.

Anesthesia

for digital vaginal examination, 42 f.

for kidney surgery, 258

for surgery (general), 249

Anus

abrasions and fissure, 296 f.

abscess (perianal), 300

anatomy, 289 ff.

congenital malformations—types, 291 ff.

cysts, 300

embryology, 291 ff.

fissures, 297 ff.

cryptitis with, 298

diagnosis and treatment, 298 ff.

silver nitrate for, 297, 298, 299

imperforate

surgery for, 296

types, 292

x-ray diagnosis, 295

occlusion, 295

treatment, 295

Appendicitis, 240 ff.

examination in face-down position for, 234

- and peritonitis—differentiation, 239 f.
- Appendix**
 abscess, antibiotics for, 245
 ruptured
 and peritonitis, 236
 signs and symptoms, 241 f.
- Aureomycin**
 for peritonitis, 245
 for pyelitis, 287
- B**
- Barbiturates**
 for abdominal examination, 233 f.
 pre- and postoperative, 249
 rectally for examination, 234
- Bartholin glands, 93 ff**
 adolescent changes, 93 f.
 carcinoma in vulva from, 95 f
 inflammation, 95
- Bartholinitis, 93**
 diagnosis by spreads and cultures, 133
- Bed-wetting, *see also* Enuresis**
 age of abnormality, 267 f.
- Belladonna** for enuresis, 274
- Biopsy:**
 endometrial, in amenorrhea (primary),
 137, 200
 punch, through vaginoscope, 136 f.
- Bladder, urinary, 265 ff**
 capacity, 267
 and enuresis, 267 ff.
 congenital anomalies, 275
 exstrophy, 275 f.
 fixation, 265
 foreign bodies, 275
 cystoscopy for, 275
- neck**
 contracted, 276
 hypertrophy (congenital), 276 f.
 obstruction, 260 f
- neuromuscular mechanism, 266**
- position**
 in infants and children, 265
 for operation on, 258
- postoperative restoration of tone, 253**
- training in infant, 273**
- urachus**
 anomalies, 277
 cysts, 278 f.
- Bleeding, uterine, 209 ff**
 etiology of, 214
 hypermenorrhea, 214
 management of, 214 ff.
 neonatal, 210
- treatment**
 curettage, 217 f.
 hysterectomy, 219
 for immediate hemorrhagic bleeding,
 215
 irregular bleeding, hormone induced,
 216
 estrogen, 216
 progesterone, 216 f.
 testosterone, 217
 thyroid medication, 217
 ligation of uterine artery, 219 f
 for persistent or recurrent bleeding,
 215 f.
 x-ray irradiation, 218 f.
- Blood loss in surgery, 250, 251**
- Blood transfusion**
 postoperative, 252
 during surgery, 250, 251
- Bone age: x-ray study in amenorrhea**
 (primary), 203
- Breasts**
 adolescent development, 173 ff.
 endocrine aspects, 173 ff.
 bosom consciousness, 175
 cancer, in adolescence, 177
 development
 failure, at adolescence, 175
 precocious, in young children, 177,
 178
 disorders in adolescence, 175 ff.
 engorgement
 neonatal, 174, 177
 premenstrual, 176
 evolution through childhood, 173 f
 hormone therapy—evaluation, 174
 hyperplasia, 177
 differentiation and management,
 177 f.
 in young children, 177
 hypertrophy (massive), in adolescents,
 179 ff.
 surgery for, 179 ff.
 in hypothyroidism, 174 f.
 lumps in, 176 f.
 nipple discharge in adolescence, 177
 pains, tenderness, in adolescence, 176
 pendulous, large, in older girls, 178 f.
 prosthesis, sponge, 175
 supernumerary, 175 f.
 thyroid influence in adolescence, 174 f.
 uterus, similarity to, 173

C

- Calamine lotion for diaper rash, 50
 Calculi: urinary, incidence, 240, 242
 "Carnal knowledge," 323
 Cervicitis, *see also* Endocervicitis
 diagnosis by spreads, 133
 Cervix uteri
 erosions, 165 ff
 treatment, 167
 glandular activity (prepubertal), 166 f
 pubertal changes, 188, 190
 size and characteristics, 162 ff.
 Cervix, vaginal, *see also* Cervix uteri and
 Endocervix
 conformation, 164 f
 contrast with adult, 99, 104, 105, 106
 glandular structure, 100 ff
 infection in, 99, 103
 Chloramphenicol
 for peritonitis, 245
 for pyelitis, 287
 Chloride balance
 postoperative maintenance, 251 f
 preoperative management, 247 f.
 Circumcision, 61 ff.
 for masturbation, 62, 64
 technic, 63 f.
 Clitoridectomy, 61
 for masturbation, 64 ff.
 Clitoris, 57 ff.

 embryology, 25
 examination, 37 ff.
 foreskin
 adherent, 60, 61, 62
 types, 58, 59, 60
 hypertrophy
 clitoridectomy for, 64 f.
 significance, 60
 inflammation from smegma and filth,
 60
 sensitivity to stimuli, 57
 size, 59 f.
 visualization, 38 f.
 Codeine. overdose, 248
 Colon
 adenomas, 302 f.
 hypertrophy—signs, 295
 papilloma, 302 f.
 polypoid disease (multiple), 304 ff.
 treatment, 305 f.
 polyps, 302 ff.
 multiple sessile, 304

- treatment, 303 f.
 sigmoid—anatomy, 289 f.
 tumors, 302 ff.
 Colpotomy: in infants, 243
 "Consent," 323 f.
 Constipation, perianal abrasions from,
 mineral oil therapy for, 297
 Cortisone treatment for pseudoher-
 maphroditism, 31
 Cryptitis: with anal fissures, 298
 Cryptomenorrhea, 159 ff., 197
 diagnosis, 159
 management, 160 f.
 Culture diagnosis
 of gonorrhea, 125 ff.
 examination of cultures, 129 f.
 interpretation of results, 130
 mediums for, 126 ff.
 oxidase test for organisms, 128 f.
 paraphenylene diamine HCl in, 129
 pure culture technic, 130 ff
 of proctitis, 308
 Cyst
 anal, 300
 dermoid abdominal, 226
 dermoid genital, 226
 ovarian, 226
 of urachus, 278
 Cystitis and enuresis, 269
 Cystoscopy
 for bladder foreign bodies, 275
 technic, 256 f
 in young infants, 262

D

- Diabetes enuresis with, 269
 Diaper
 blood on, 116
 brownish discharge on, 116
 cleansing to eliminate ammonia, 51
 nonsanguineous discharge on, 116
 rash, 49 ff.
 Diverticulitis: Meckel's (differentiation
 from peritonitis), 242
 Doderlein's bacilli in vagina, 117
 estrogenic effect, 117
 and gonorrhea diagnosis, 123
 and vaginal pH, 137
 Douche vaginal, for vaginitis, 115 f.
 Ducts, genital embryology, 21 ff.
 Dysmenorrhea, 220 ff.
 ammonium chloride for, 222
 endocrine therapy, 221 f.
 psychogenic aspects, 221 f.

E

- Electrocoagulation
for stubborn vaginal infections, 167
through vaginoscope, 135 f
- Endocervicitis, 120
diagnosis by spreads, 120, 133
- Endocervix
contrast with adult, 99
electrocoagulation through vaginoscope,
135 f, 167
glands
characteristics, 166 f
structure, 101 f
infection in, 97, 102 f
at term, 166
- Endometrium
biopsy, in amenorrhea (primary), 137,
200
glandular development, 188, 238
nonovulatory, with beginning men-
struation, 199
- Enuresis, 267 ff
belladonna for, 274
bladder capacity and, 267
and bladder training, infant, 273
causes
genitourinary disorders, 269 f
psychogenic, 270 ff
examination for, 272
familial nocturnal, 270
history in, 272
incidence, 268 f.
and laziness in child, 271
management, 272 ff
device for awakening child
(Mowrer), 273 f.
punishment for, 274
- Epispadias, 265
- Estrogen
for amenorrhea (primary), 206
for cervical erosions, 167
deficiency causing vaginitis, 115
determination in amenorrhea
(primary), 198
and Doderlein bacilli in vagina, 117
effects on immature vagina, 105, 110
first appearance, 192, 193
for premenstrual breast engorgement,
176
therapy
side effects in children, 206
vaginal epithelial response to, 120
for vaginitis (noninfectious), 144 ff.
for vaginitis—rationale, 105

- side effects, 147
suppositories for, 146 f.
topically, 105

Examination

- abdominal—technic, 47
barbiturates rectally for, 234
for enuresis, 272
of external genitalia, 37 ff
office setup and equipment for, 34 f
of pelvic viscera, 233 f.
for pyelonephritis, 285 f.
rectal—technic, 43 ff.
rectoabdominal—technic, 46
rectovaginal, 46 f
routine visual—technic, 37 ff
vaginal digital—technic, 41 ff.

F

- Fallopian tubes
at puberty, 192
structure, 236 f.
- Fat deposition at adolescence, 172
- Fertility in puberty, 195 f
- Fluids
balance
operative management, 250 f
postoperative maintenance, 251 ff
preoperative management, 247 ff
postoperative
by clysis, 252
orally, 253
- Foreign bodies
in bladder, 275
cystoscopy for, 275
rectal, 291
management, 309 f
urethral, 265
vaginal, 150 ff.
bloody discharge with, 120
diagnosis, 152 ff
treatment, 154
removal through vaginoscope, 135
- Foreskin, *see* Clitoris
- Foster home
for masturbating girls, 81 f.
for vaginitis patients, 149 f.

G

- Genitalia, external, *see also specific sites*
adolescent changes, 172 f.
definition, 27
embryology, 24 f.
examination—visual, 37 ff
trauma from rape attempts, 56
- Genitalia, pelvic, 185 ff

Genitalia (*cont*)

 for menstrual disturbance with hypo-
 thyroidism, 193
 therapy for delayed menarche, 204 f.
- Trichomonas vaginalis vaginitis from,
 115
- Tumors**
 abdominal, 225, 232
 of genital area, 225
 intra-abdominal, 225 ff.
 Wilms', 282 f.
 x ray therapy and surgery for, 282 f.

U

- Ureter, 279 ff.
 in bladder function, 267
 with bladder neck obstruction, 261
 congenital lesions, 261
 constriction—normal, 279
 dilation for pyelitis, 286
 obstructions, 261, 279 f.
 orifices
 distorted by obstructive lesions, 261
 duplicated in bladder, 279
 misplaced in urethra, 265
 in pyelographic studies, 257
 reduplication, 279
 strictures, 279 f
 -vesical junction, obstruction, 261
- Ureterocele, 261 f
- Urethra, 262 ff
 in bladder function, 266
 dilatations for pyelitis, 286
 diverticula, 264 f
 drainage for pyelitis, 288
 foreign bodies, 265
 glandular infections, 263
 orifices (ureteral) in, 265
 position for operation on, 258 ff
 size and length, 262
 spreads from, 120
 stenosis, 263
 and vaginal infection, 114
- Urethritis, 263
 and enuresis, 269
 gonorrhoeal—diagnosis by spreads, 133
- Urethroscope, 35, 37
 procedure with, 30, 134 ff
 for vaginal examination, 35, 37
- Urinary tract, 254 ff
 enuresis from congenital anomalies, 269
 examination, 254 ff
 cystoscopy, 255 ff
 pyelography, 257
 by x rays, 255
 infections, 285 f.
 significance, 260
 treatment, 286 ff.
 obstructive lesions, 258 ff
 stasis and infection—management, 258 f
- Uterus, 162 ff
 cervix, 164 f
 characteristics, 164
 corpus, 162
 development, 185 ff
 double—embryology, 23

- endometrium, 163 f.
 glandular structure, 163 f, 186 ff
 pubertal changes, 188
 epithelium, 163 ff
 erosions, 165 ff.
 management, 167
 size and conformation, 162 f, 197 f

V

- Vagina, 97 ff
 anatomy and physiology, 97 ff
 annular prolapse of, 154 f.
 bacteriologic considerations, 117 ff
 congenital absence, 156, 157
 embryology, 23
 and hymenal occlusion, 84, 87
 discharge
 bloody, with foreign body, 120
 inspection for, 39
 in newborn, 116
 in peritonitis diagnosis, 238 f.
 in rape (alleged), 312
 in spreads, 41
 epithelium, 103, 105, 106, 107, 108, 109
 estrogen effects on, 105
 life cycle, 107
 with pH changes, 103 f, 107
 in vaginal spreads, 120, 124
 examination
 digital, 41 ff.
 visual—instruments for, 36 f.
 foreign body in, 150 ff
 diagnosis, 152 ff
 treatment, 154
 infection, *see also* Vaginitis
 diagnosis, 111 ff
 lymphatic fistula of, 155
 electrocoagulation, 155 f.
 pH of, 103, 137 f, 200 f
 punch biopsy of, 136 f
 pus in, 41
 rectovaginal examination, 47
 for foreign bodies, 153 f
 stasis from occluded hymen, 68
- Vaginal spreads
 in adolescence, 201
 in amenorrhoea (primary), 200
 epithelial picture in, 119, 124
 identification of organisms, 121 ff
 mucus in, 120
 staining technics, 121 ff.
 technic of procuring
 by glass catheter, 41

- by swab, 40
- Vaginitis, 111 ff.
 - see also* Vaginitis, gonorrhoeal
 - diagnosis, 111 ff.
 - by culture, 125 ff
 - by pure culture, 130 ff
 - by spreads, 119 ff
 - differentiation determining treatment, 115
 - diphtheric, 115
 - epidermophytosis in, 115 f
 - estrogen therapy, 144 ff.
 - rationale, 105
 - side effects, 147
 - suppository technic, 146 f
 - from hypoestrinism, 114
 - and cure rate (over-all), 139, 140
 - estrogen therapy, 144 ff
